

Copper Peptide Serum — Cheat Sheet

Your quick-reference guide for getting the most from your serum

01 How to Layer It

MORNING (AM)

- 1 Gentle cleanser
- 2 Copper Peptide Serum (2–3 drops, on clean skin)
- 3 Moisturizer
- 4 SPF 30+ (always last)

EVENING (PM)

- 1 Gentle cleanser
- 2 Copper Peptide Serum (2–3 drops, on clean skin)
- 3 Moisturizer
- 4 Face oil or night cream (optional, last)

02 What Plays Nice (and What Doesn't)

INGREDIENT	TOGETHER?	HOW TO USE SAFELY
Vitamin C	Separate	Vitamin C in the AM, copper peptides in the PM.
AHAs / BHAs	Separate	Alternate nights (acids 1–2× a week).
Retinol	With care	Alternate nights, or copper AM + retinol PM.
Niacinamide	Yes	Already in the formula — plays beautifully.
Hyaluronic acid	Yes	Apply to slightly damp skin, then the serum.

03 What to Expect (Be Patient)

TIMEFRAME	WHAT YOU'LL NOTICE
Week 1–2	Better hydration, softer texture, a calmer, more awake look. No firmness changes yet.
Week 3–4	Smoother-looking skin, more even texture, a more rested look.
Month 2–3	Cumulative: the look of improved firmness, softer-looking fine lines, a healthier-looking tone.

What it won't do: erase deep wrinkles, replace in-office procedures, or produce overnight results.

04 5 Mistakes to Avoid

- 1 Layering it with Vitamin C in the same step. Use them at different times of day.
- 2 Applying it over heavy oils. Copper peptides are water-loving — serum first, oils last.
- 3 Quitting before week 8. Visible changes in the look of skin take 60–90 days.
- 4 Using too much. 2–3 drops covers the whole face. More isn't faster.
- 5 Forgetting your neck. Extend downward past the jawline.

STORAGE

Keep below 25°C / 77°F. Avoid direct sunlight and steamy bathrooms. Cap tightly after each use. Patch test before first use; use within 12 months of opening.

THE GLOW WELL
